

EDUCATION

University of Michigan <i>Bachelor of Science in Data Science Minor: Classical Civilizations LSA Honors GPA 3.62/4.0</i>	Ann Arbor, Michigan <i>Aug 2021 – May 2025</i>
--	---

EXPERIENCE

Sourcing and Procurement Analyst Accenture - Benchmark IT service rates against industry standards to identify cost-reduction levers and negotiation points - Establish comprehensive spend baselines in Excel and perform contract reviews to uncover savings opportunities	<i>New York, New York, Sep 2025 - Present</i>
Research Assistant University of Michigan Bioinformatics - Enhanced pre-built PyTorch CNN by integrating a time distribution layer to reproduce gene profiling results - Added diffusion layer to pre-trained TensorFlow model to predict sequence variation effects on gene expression	<i>Ann Arbor, Michigan, Aug 2023 – May 2025</i>
Data Analyst Michigan Men’s DI Ice Hockey - Collaborate with coaching staff and analyst team to evaluate player health data and improve athletic performance - Leverage Python and R to visualize empirical data and provide weekly reports on how to improve team performance	<i>Ann Arbor, Michigan, Aug 2021 – May 2024</i>
Applied Intelligence Summer Analyst Accenture - Analyzed pilot results for a predictive model using SQL and presented model improvement insights to client directors - Designed a Gen AI model to match over 1,000 employees to open projects within Accenture’s Data and AI practice	<i>New York, New York, May – Aug 2023, 2024</i>

TECHNICAL SKILLS

Languages	: C++, R, Python, SQL, JavaScript
Platforms	: Claude Code, Codex, Power BI, Tableau, RShiny, PowerPoint, Excel, Teradata, Confluence
Libraries	: Pandas, Numpy, xGBoost, OpenAI, NLTK, Gensim, Tweepy, PyTorch, Tensorflow
Dev Tools	: Visual Studio Code, Anaconda, Jupyter, XCode, Posit, Git, Gitlab, GPT

PROJECTS

Live Apartment Tour and Review App GitHub - Built a cross-platform React Native app for apartment reviews and live video tours with user and guide flows - Implemented map-based search, tour scheduling, and live claiming using REST APIs and geospatial filtering - Integrated Stripe payments and review pipelines to support paid bookings, cancellations, and post-tour feedback	TypeScript, React Native, Python, Flask, Stripe
MLB Baseball Analytics Website GitHub - Built a full-stack analytics web platform with React and TypeScript backed by live MLB Stats API data - Engineered a 3D pitch visualizer that animates pitches using kinematic data and extends into a batter simulation - Automated daily data ingestion via GitHub Actions to run a Python API pipeline twice per day	Python, Claude Code, MLB API, TypeScript
College Football Spread Prediction Model GitHub - Scraped eight years of historical play-by-play data from a public college football API, cfbfastR - Trained an xGBoost model to predict weekly game spreads at an accuracy 4% over efficiency threshold for profit	R, RShiny, CFB API
